IMAGE UPLOAD *cheat sheet*

Every image you add to the submission form needs to meet these three rules. Smaller files upload reliably, keep the website fast & transfer cleanly to our online shop — and a web-sized photo still looks sharp on screen.

2 MB	JPG · PNG	2000 px
MAXIMUM PER IMAGE	ACCEPTED FILE TYPES	LONGEST SIDE · TARGET

FOUR EASY WAYS TO RESIZE

ON YOUR PHONE — QUICKEST

1. Email the photo to yourself.
2. When asked for a size, choose Medium (or Large, if it stays under 2 MB).
3. Save the emailed copy and upload that one.

Size choices appear in iPhone Mail and on many Android phones.

WINDOWS — PHOTOS APP

1. Open the photo in the Photos app.
2. Click ••• (See more) › Resize image.
3. Set the longest side to 2000 pixels.
4. Save as a copy — your original stays untouched.

MAC — PREVIEW

1. Open the photo in Preview.
2. Choose Tools › Adjust Size.
3. Set the longest side to 2000 pixels.
4. Choose File › Export and save as JPEG.

ANY COMPUTER — FREE ONLINE

1. Go to squoosh.app and drop in your photo.
2. Turn on Resize and set the longest side to 2000.
3. Choose MozJPEG, then click download.

A free Canva account is handy for cropping & straightening first — download as JPG.

CHECK YOUR FILE SIZE

- Windows — right-click the file › Properties
- Mac — select the file › File › Get Info
- Phone — open the photo & tap the info (i) button

Still over 2 MB? Resize again, a little smaller.

PHOTOGRAPHING YOUR WORK

- Soft daylight, no flash
- Shoot straight on, then crop to the edges of the piece
- Watch for glare from glass, glaze or varnish
- One artwork per photo
